Setup

change directory to /data-quality/monthly/

```
options(stringsAsFactors = FALSE)
# install.packages(c('dplyr', 'stringr', 'tidyr'))
# devtools::install_github("ropensci/alm", ref="alerts")
library('dplyr')
```

```
##
## Attaching package: 'dplyr'
##
## The following object is masked from 'package:stats':
##
##   filter
##
## The following objects are masked from 'package:base':
##
##   intersect, setdiff, setequal, union
```

```
library('stringr')
library('alm')
```

```
##
##
## New to alm? Tutorial at http://ropensci.org/tutorials/alm\_tutorial.html. Use suppressPackageStartupMessages()
```

```
library('ggplot2')
```

```
## Loading required package: methods
```

```
library('tidyr')
```

Stuff

```
print("hello world")
```

```
## [1] "hello world"
```
