Setup

change directory to /data-quality/alerts/

Install `alm` if not installed already, then load package

```
# source functions
source("helper_fxns.R")

# install.packages('stringr')
# devtools::install_github("ropensci/alm", ref="dev")
library('stringr')
library('alm')
library('plyr')
library('dplyr')
library('tidyr')
library('assertthat')
library('ggplot2')
library('lubridate')
library('knitr')
```

Stuff

```
print("hello world")
```

```
## [1] "hello world"
```
